TOKEN PRODOX INFORMATION

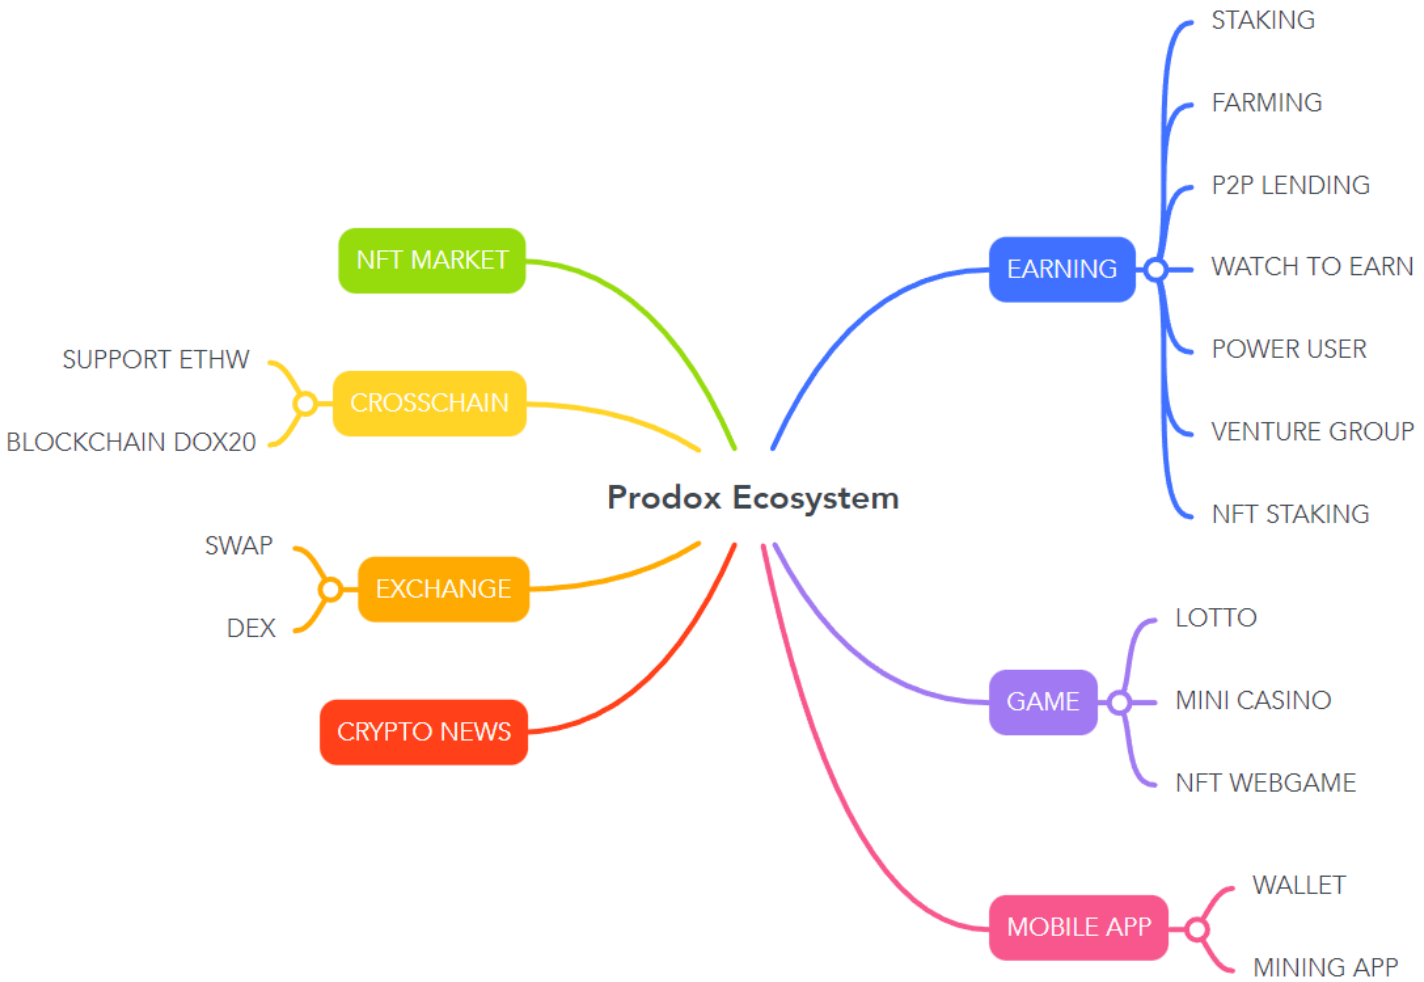
- NAME: PRODOX TOKEN
- SYMBOL: DOX
- DECIMAL: 18
- TOTAL SUPPLY: 500,000,000 TOKEN
- WEBSITE: PRODOX.IO
- NETWORK: BEP20
- CONTRACT ADDRESS: 0xae90Ae6320c60dA6cBdd35335cB95c76f5700023

WHAT IS PRODOX?

Prodox is a multichain fundraising platform, NFT marketplace for NFT that are building the future as well providing many defi system for crypto user. With serious working spirit, our team has carefully selected high-quality projects that have value for the crypto space. High risk ideas have never been our focus. The most important thing for us is our reputation and the trust of our users. Unlimited opportunities are available for token holders: free lock drop rewards, free NFT mints, access to private and seed rounds of promising startups, opportunity to be a part of the community of experienced investors and a lot more like staking - farming - p2p lending.....Build, invest, and earn more with Prodox

Prodox is Super defi project with investment launching pad for Global Investors, Ventures & Startups. We are committed to create safer investment zone for private investors & onboarding the best crypto startups for our friendly ecosystem.

Prodox - Ecosystem



- Prodox Ecosystem will focus in User to enjoy Full Defi Services
- Prodox service will balance with Earn – Play – Spend with support crosschain function for user moving asset easily with low fee – safe – decentralized.
- Following page will explain some main services of Prodox.

P2P Lending

P2P lending is a service that provides users to lend to each other with an agreed interest rate, number of loan days and collateral.

Borrower: A

Lender: B

A will use BTC/ETH/BNB (BEP20) as collateral to protect the loan

Loan will be Stable-coin (BUSD - USDT - USDC)

When A has a need to borrow money but does not want to sell Assets, A will submit a loan request to the dApp with the following parameters:

1-Amount A want to borrow

2-Loan interest rate (By day / week / month)

3-Prepaid penalty interest.

The loan amount will be up to a percentage of the collateral and valued at the market price at the time of the loan

When the loan amount is overdue for repayment or the loan amount is equal to the value of the collateral at the time of borrowing, the property will be liquidated to secure the loan.

B: when needing lending, will provide his capital source and the desired interest rate.

A and B can deal with each other, but this is anonymous to avoid money laundering (Lending itself to legitimize the source of money)

When A and B agree, a contract will proceed and will automatically lock the assets of the parties. After a certain period of time, A will receive the money. The exchange will lock the property. In case A pays late interest, the property will be partially sold to pay party B. And the asset value is lower than the safe threshold at that time, the property will be automatically liquidated and transferred to party B.

Another case is that if the property value is lower than the safe threshold, Party A will receive an email notification to finalize the property (no penalty). In case Party A does not proceed, the property will be self-liquidated to ensure loan safety.

Loan cost will use Prodox Token as transaction fee.

This transaction fee will automatically convert into Prodox Token and add to liquidity (Insurance Fund)

LOTTO

Lottery ticket service includes products Mega 6/55, 6/40, KENO....

When the user plays, he will buy a ticket with a value of 1000 DOX (Price can be adjusted depending on the appropriate time). This DOX value will be transferred to be partially burned and the rest will be transferred to the bounty wallet. This wallet will be public for the community to monitor and track.

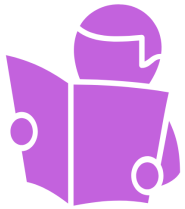
Rewards will be cumulative every week and unlimited.

POWER USER

Power User is an interesting function.

Each user when using Connect Wallet to our service will be created 1 user with parameters including Level - Xp

The higher the level, the more great benefits you will enjoy such as: increased mining speed in Loyal Mining, Faster Claim in Watch to earn, Lower fees when trading at DEX, Staking - Farming will have more Bonus. We are building a user-centered and user-centric policy at the heart of the entire defi . service



MAIN EARNING APP

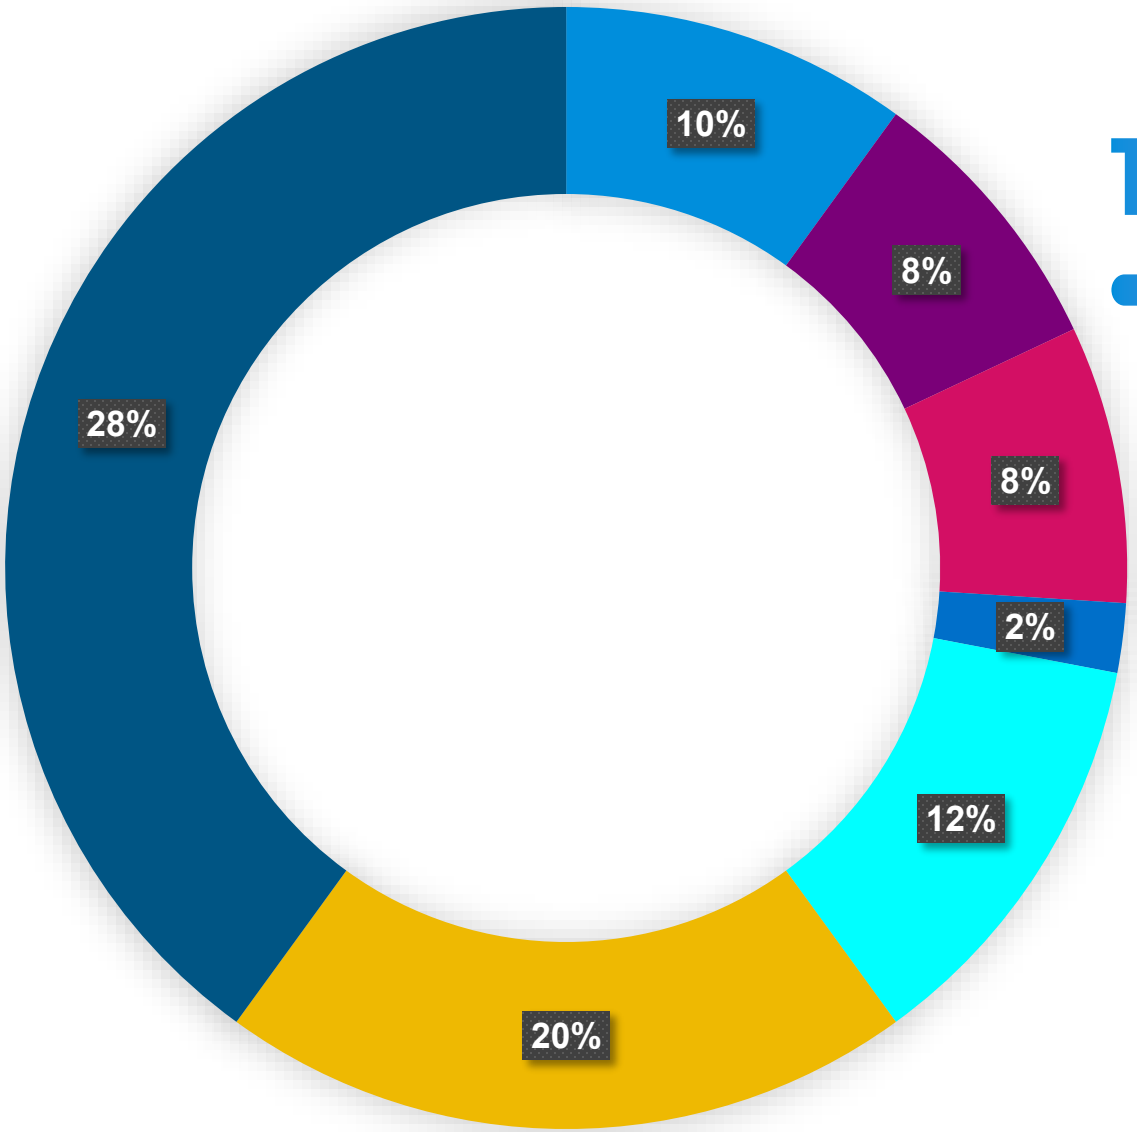
Staking is a service that uses other cryptocurrencies and enjoys DOX. New to DOX Staking is the service that links the user profile and calculates the bonus based on the user's level. This is passive income worth looking forward to. This service will extend to staking potential tokens of partners.

Yield Farm service is a service that uses LP to harvest DOX Tokens. DOX Farm also supports pools of potential tokens.

Watch To Earn service: This is a service deployed at App Crypto - World, a site that aggregates information about the Crypto world to support users with more information and knowledge. This service will give DOX Tokens to those who diligently read the news.

Loyal Mining service: this is a service deployed on DAPP and Mobile App platform. This service allows users to mine DOX tokens based on the user's Level. This is quite an interesting service, increasing user interaction even more.

TOKENOMIC



- Token sale
- Services Fee
- Mining distribution
